Stephen

Here is a copy of the FSP addendum. Please note that the only soil samples taken in AOC 1 and AOC 2 were those taken as part of the installation of monitor wells. Based on the data collected the FSP may be revised to include more or fewer samples. Also we were not able to get sight access for the background sampling of the wetlands and are looking at other nearby locations for possible background samples. I am not sure that it will be necessary if the data collected in AOC 3 is all below risk levels that is a question to be answered before going back out in the field. Also based on the background sampling for the temporary wells, we may determine that additional sampling in AOC 6 and AOC 7 is not necessary as well.

Thanks

Brian:

Enclosed is a PDF copy which includes the cover letter, transmittal form and Addendum to the Field Sampling Plan for the Falcon Refinery RI/FS (TO-0088-RICO-06MC). The addendum reflects the changes documented in Field Change Form 01. The hard copies and other electronic copies of this plan are being shipped to you and the designated stakeholders today. Please let me know if you have any questions.

Thank you,

Bob Owens
